Haskell

SCRUM

Customer Service

## EXPERIENCE

### Software Engineer

*The Hut Group*

Mar. 2020 - Present

- Worked alongside project & product managers to oversee projects; planning deliverables and milestones, organising and managing the projects' developers
- Currently in charge of front-end firefighters; an initiative that handles urgent customer-facing issues that affect a platform which hosts over a 100 websites
- Designed, engineered, and implemented CSS sharding across 100+ sites to improve their performance in page load times, and lighthouse performance ratings
- Worked alongside the talent team to conduct technical interviews for graduates
- Mentoring new starters

### Graduate Software Engineer

*The Hut Group*

Aug. 2018 - Mar. 2020

- First line support, bug investigation, documentation and fixes
- Worked on transforming a front-end platform comprising several websites from using separate mobile and desktop pages to using single responsive pages
- Improved the performance of a monolith front-end application by purging deprecated/redundant libraries, and heavily refactoring the codebase
- Maintained and implemented new features in backend services
- Engineered implementation of form attack mitigation using Recaptcha

### Intern Software Engineer

*Mentor Graphics; a Siemens Company*

Jul. 2016 - Jun. 2017

- Bug investigation, documentation, and fixes
- Developed additional features in an Angular JS app
- Developed UI components for a Wire-framing desktop app in Java

### Engineering Intern

*ATG Access Limited*

Aug. 2015 - Sept. 2015

- Worked with site engineers and electrical engineers to develop specification documents for security bollards
- Occasionally partook in bollard installation on-site
- Researched competitors' business and specification documents to inform my task of developing specification documents for ATG Access
